I was born in Brescia (Italy) on March 19th, 1983.

I received the Laurea degree in Information Engineering and the M.S. in Electronic Engineering from the University of Brescia in 2007 (I level) and in 2009 (II level), respectively.

Since May 2008 I have carried out my research activity at the Laboratory of Optoelectronics, Department of Electronics for Automation (DEA), University of Brescia.

The main research areas are focused on the project and development of vision systems for contactless 2D and 3D measurement.

On November 2009 I started my activity as a Ph. D student at the Laboratory of Optoelectronics, and, at the moment, I'm involved into a project on the control of industrial robots using vision.

I have authored or co-authored the following papers:

- [1]. P. Bellandi, G. Cavagnini, M. Mancini, G. Sansoni, Progetto e sviluppo di un sistema 3D per misura di eccentricità, Atti del XXVI Congresso Nazionale Associazione GMEE, Salerno 2009 (in pubblicazione).

I attended the following International/National Conferences:

- [1]. 110th Joint Meeting of the DGAO-SIOF Societies, Brescia June 2nd to 5th, 2009.
